

Abstract

5

A watercraft, comprising at least one floating body (1, 2) as well as drive means (3, 4) and steering/control means (6), has at least two floating bodies (1, 2) stacked one on top of the other. The two floating bodies are connected by at least one connecting means (7). At least one damping means (10, 11, 12) is located between the two floating bodies (1, 2), and the intermediate space (14) between the two floating bodies is sealed by sealing means (10, 12).
